**YEARS OF
EXCELLENCE IN
EDUCATION**

The Scope for
**NURSING
PROFESSION**
is Unlimited world wide

I solemnly pledge myself before God,
And in the presence of this assembly,
To pass my life in purity,
And to practice my profession faithfully,
I will abstain from whatever is
deleterious and mischievous,
And will not take or knowingly
administer any harmful drug.
I will do all in my power to maintain
And elevate the standard of my profession,
And will hold in confidence.
All personal matter committed to my keeping,
and all family affairs coming to my knowledge,
in the practice of my calling,
With loyalty I will endeavor,
To aid the physician in his work,
and devote myself to the welfare of,
Those committed to my care.

Education gives meaning and purpose to human life

It was our strong desire to bring women in the track of Quality Education. We believe that their empowerment is really an inspiration to the society. If bring them in the front line through Education, a family will move to prosperity.

We set transform the society with values Knowledge through education

Our motto is to mix the ancient values with modern outlook.

We believe earth's great treasure lays in Human personality and service to the humanity is the best work of life. We present before you a well equipped Nursing College, we promise that you will meet the Teachers who pat on your shoulder to empower you.

As a result, you will be given wings to fly to your dream career and success.

Nursing Services

Everyone desires to attain optimum health with the best of nursing services. The development of a country is measured in terms of the health of the people and the services rendered to the sick and needy. The achievement of the country in preventing diseases and promoting health depends upon the contribution of all members of the health team, particularly that of nurses. Life cannot be saved merely by medicines and surgery. Nursing is equally important to save life and relieve suffering. Nursing is also an art and science. Nurses should be capable of serving the sick with compassion and caring hand. There are wide range of opportunities globally for nurses in the field of health and for advanced studies to develop expertise in practice, administration and teaching of nursing.

For all career minded youngsters, this is an opportunity to enter this great profession. It is unique because, there is an element of service to humanity, coupled with achievement and orientation of a noble profession.

National School & College of Nursing is in the process of establishing other Medical & Para-Medical courses i.e., Pharmacy, Physiotherapy, Medical Laboratory Technology etc., Affiliated to Rajiv Gandhi University of Health Sciences, Bengaluru.

- Educational Methods & Media for Teaching in Practice of Nursing
- Professional Trends & Adjustment
- Internship
- Administration & Ward Management

High Quality Teaching

Daily, nurses face complex situations where knowledge, critical thinking, and problem-solving skills are required for safe patient care. Thus, nurse faculties are challenged to prepare competent graduates to meet the ever-changing and complex demands of the contemporary health care system. Specifically, over the last decade, there has been a shifting paradigm in nursing education from a teacher-centered to a learner-centered classroom environment, prompting educators, clinicians, and health care employers to pose many questions about effective teaching strategies. How can educators facilitate critical thinking, clinical decision making, and instill values of lifelong learning? What are the key elements of an effective nurse educator? Teaching in Nursing for nursing students the faculties serves as guide to respond to these questions and help nurse educators facilitate student learning goals.

Well trained faculty

Nurses are health care professionals with direct responsibility for patient care. Nurses work in hospitals, clinics, long-term care facilities, schools, corporations, and many other settings. In hospitals, nurses provide care under a treatment plan prescribed by doctors, but often have considerable responsibility for managing the details of the patient's daily care. In other settings, nurses may be the first health care professional seen by a patient, and may be responsible for recommending treatment in conjunction with the doctor. Nurses combine medical expertise with strong interpersonal skills and a desire to help people.

To become a nurse, high school courses in math and science are required. Nurse training programs are offered at hospitals, junior colleges, community colleges, and four-year colleges. The degree of training offered by each differs, as does the advancement possible as a result. Following graduation from the training program, the student must pass a state licensure exam to become a registered nurse (RN), and is then able to work as a nurse. Further education allows the RN to obtain a master's degree in nursing. This is required to become a nurse practitioner (a nurse who performs many of the same functions as a family-practice doctor), a nurse-midwife (provides care to maternity patients), or several other nursing specialties.

Practical Demo

The Programme

Nursing is designed to develop an attitude in the students, provide necessary knowledge and skills to recognise and intelligently interpret the physical, mental and emotional manifestation of illness and prepare them to plan individual nursing care based on their unique needs.

The programmes also help develop abilities to work with other specialist medical and paramedical personnel, devise and demonstrate disease prevention and health promotion programmes, integrate principles of hygiene, ethical and moral codes are aspects taught in the programme. On a higher scale, tools to research, apply advances in scientific field and technology are built in Nursing Caring services in both public and private sectors including day care, health care and residential care, Nursery, Primary Schools, Family Centres, Hospitals, Voluntary sectors, Corporate houses, Resorts, Retreats, the opportunities are limitless on a global scale. As India emerges as the health-care tourism destination, employment opportunities to professional nurses, only abound in future.
